Disability-related Research Activities Across Levels

- World Bank/WHO Report
- Association of Southeast Asian Nations (ASEAN)
- World Bank
- Asian Development Bank
- Global Partnership for Disability and Development (GPDD)
 - http://gpddonline.org
- Inclusive poverty reduction strategies
- Millennium Development Goals
- United Nations Convention on the Rights of Persons with Disabilities
- NGOs
- WHO
- UNICEF
- IASSID & other world-wide disability organizations

- Local levels
- (on ground)

- Universities
- Research Centres

 Country-level activities

Complexities

- Other reasons for lack of research:
 - the absence of a strong commitment to inclusion by the Central and State governments
 - lack of enforcement of equal rights for persons with disabilities
 - systematic exclusion, remnants of the Caste system
 - negative attitudes toward persons with disabilities
 - historical disadvantages
 - lack of employment opportunities
 - inadequate planning,
 - slow implementation of appropriate education and services
 - extreme shortages of trained personnel
 - cultural norms (Kalyanpur, 2008; Cuskelly, 2009).
- Country by country, region, village by village strategies

Thematic Analysis

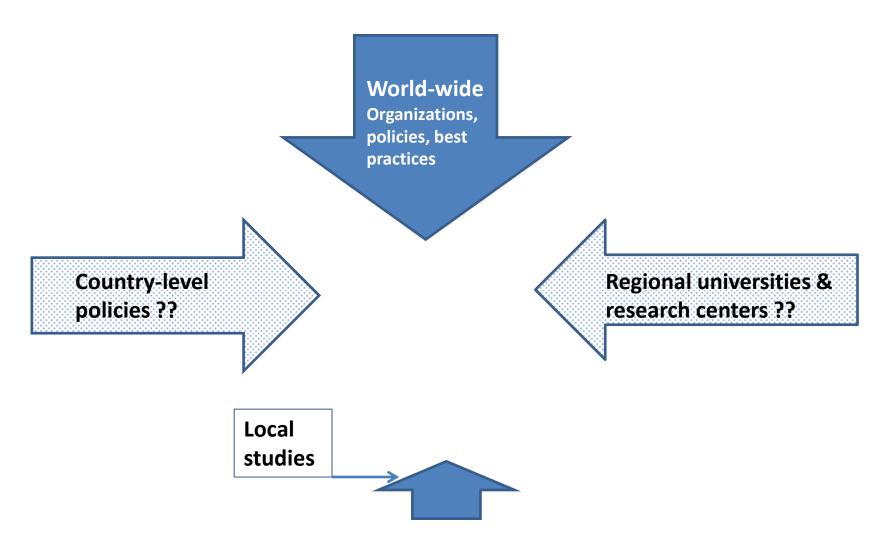

- Most published research studies have been "ad hoc"
 - Researcher-led, personal interest
 - NGO-related
 - Dependent on individuals, funders' interests
 - Local, villages
- Early intervention, children, families
- Access to services; policy and legislation
- Inclusive education
- Elderly,
- Poverty and economic instability
- Rehabilitation
- Labour market
- Culture, beliefs
- Policy documents
 - World Bank, WHO, UN Convention on the Rights of Individuals with Disabilities, Millenium Development Goals
- Absence of documents and policies
 - Country-wide
 - Universities
 - Research centers

At the Ground Level

Patterns of Research and Policy Activities in ID in SE Asia

Disability and Poverty in Southeast Asia

- For the most part, persons with intellectual disabilities (ID), their families, services, communities, policies, etc. have not been systematically studied in SE Asia.
- Kowk & Chui (2008) surveyed countries and territories in Southeast Asia.
- Many people with disabilities are also desperately poor (Groce, Kett, Lang, & Trani, 2011) and there is an inextricable link between poverty and disability.
- Individuals with disabilities and their families are more likely to live in poverty than persons without disabilities (http://www.un.org/disabilities/documents/events/csoc d49panel.pdf).

Disability and Poverty

- Deprivation and abuse add to any other disabilities that are present as well as directly causing intellectual disability in their own right (Clarke & Clarke, 2000).
- The coupling of disability and poverty results in enormous vulnerabilities, inequities, and injustices.

Research-Policy-Practice Gap

- IASSID Academy articles (Hassiotis, Brown, Brown, Favila, McConkey, Jokinen, & Lucchino, 2011) have highlighted a gap among policymakers, practitioners and researchers which has resulted from the lack of sharing of research findings and insights as they emerge
- Contributes to a continuing cycle which deepens the researchpractice-policy gap
- Some researchers may conduct research in areas that may not be relevant to practitioners
- Practitioners may not readily apply research findings that are produced
- Policies that are put in place by governmental and other organizations may not be based on solid research inputs and emerging insights from practice

Research-Policy-Practice Gap

- Changes and practices and policies are influenced infrequently as a result of research studies because there is a lack of alignment among research, practice and policy cultures
- Although individuals in these cultures may share similar goals, the cultures are distinct, creating gaps in understandings and cooperation (Emerson, Hatton, Thompson, & Parmenter, 2004; Lewig, Arney, and Scott (2006)).

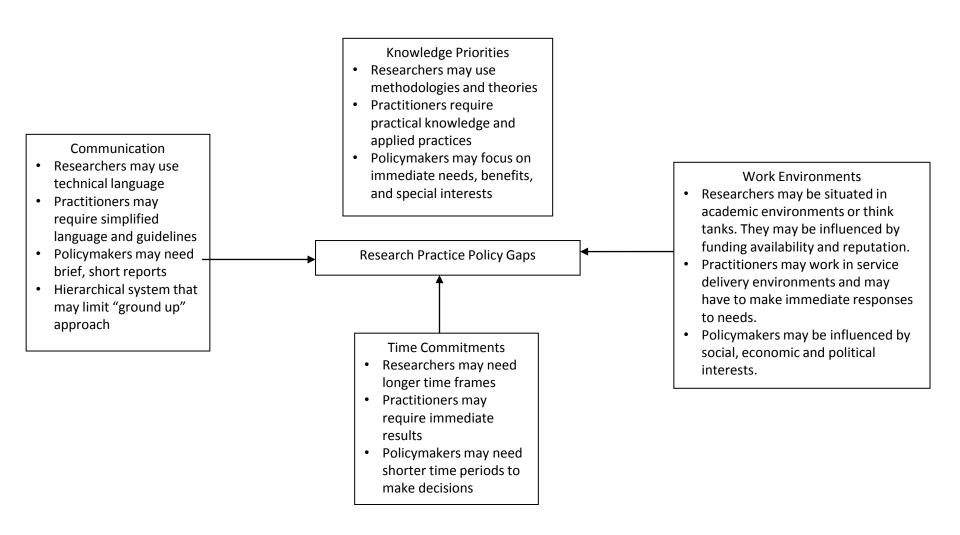

Figure 1. Gaps Among the Research Practice Policy Cultures (adapted from Lewig, Arney, & Scott, 2006).

Journal of Policy and Practice in Intellectual Disabilities (JPPID) Call for Submissions

Journal of Policy and Practice in Intellectual Disabilities (JPPID) Call for Submissions

Special issue of JPPID

 focus on the progress and challenges regarding recommendations of the World Report on Disability with respect to persons with intellectual disabilities in lower and middle income regions, countries, and political entities.

Questions

- What progress has been made?
- What are the barriers? What policies and legal frameworks have been or should be developed? In what ways have persons with intellectual disabilities been involved in responses to the World Report on Disability?

Journal of Policy and Practice in Intellectual Disabilities (JPPID) Call for Submissions (con'd)

- Policies
- Legal and political frameworks
- Research analyses
- Future directions
- Innovative practices and strategies
- Unique collaborations and partnerships among public, governmental organizations, and local initiatives
- Targeted social and economic development
- Educational participation and progress
- Inclusive employment environments
- Families and supports
- Conflict, disaster and disability
- Gender, ethnic, social, and/or cultural considerations

Journal of Policy and Practice in Intellectual Disabilities (JPPID) Call for Submissions (con'd)

- The following are the deadlines for submission:
- August 31, 2012 Submit a letter of intent to: specialissuejppid@gmail.com
- October 31, 2012 Submit working draft to editors: specialissuejppid@gmail.com
- December 3, 2012 Deadline for manuscript submission to Scholar One:

http://mc.manuscriptcentral.com/jppid

Journal of Policy and Practice in Intellectual Disabilities (JPPID) Call for Submissions

- For inquiries and suggestions, please contact one of the guest editors:
- Roy I. Brown, University of Victoria, Canada (<u>royibrown@shaw.ca</u>)
- Libby Cohen, James Cook University, Singapore (<u>lcohen71@gmail.com</u>)
- Keith McVilly, Deakin University, Australia (<u>keith.mcvilly@deakin.edu.au</u>)
