Taninthari Nature Reserve Project

Medicinal Plant Survey Report (2014-15)

Than Than Aye

National Consultant

Acknowledgement

We are greatly indebted to Director General of Forest Department, Ministry of Environmental Conservation and Forestry, for permission to do this survey.

We would special thank to U San Aung, Project Director, Tanintharyi Nature Reserved, for his kindness and suggestions.

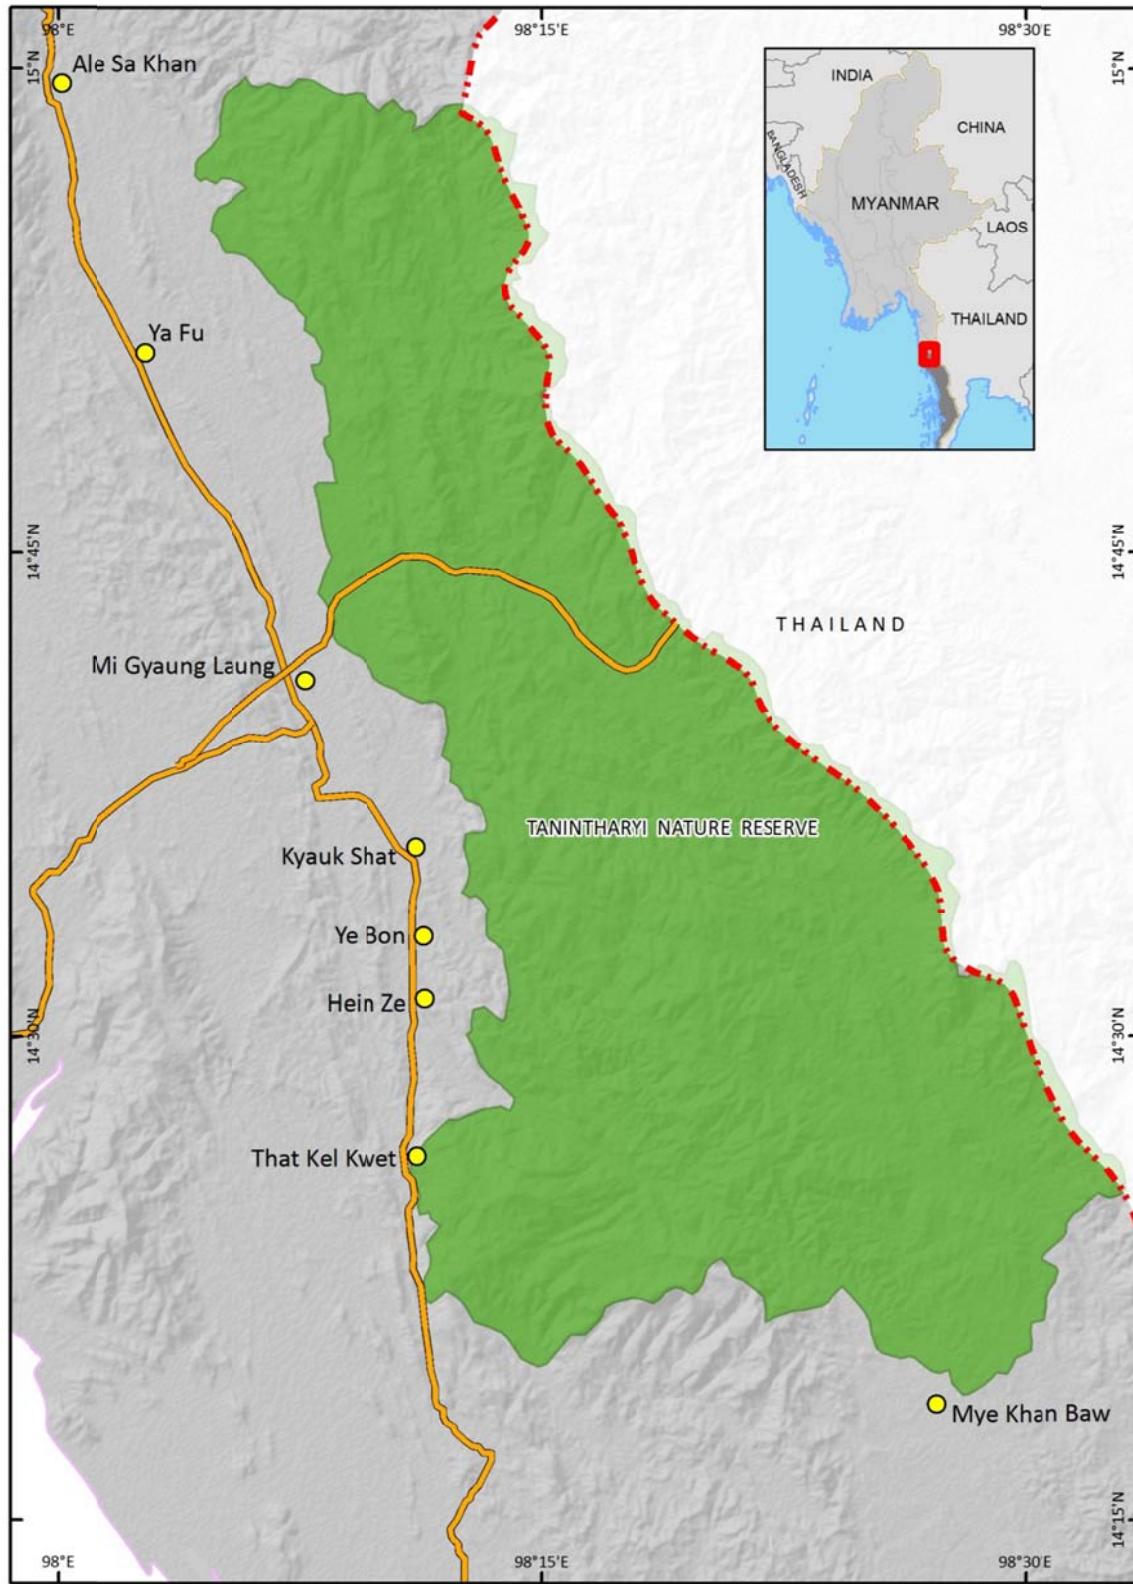

We also greatful acknowledge also to staff officers and forest rangers of Gan Gaw Taung base camp and other staffs of TNR, for their contribution of this survey.

We specially thank to local people and local Karen herbal practitioners Saya U Ba Don (86 years, Kywe Ta Lin village), Saya Saw She Nwe (59 years) Shin Ta Phe village, Sya Saw Phe Tet (56 years) Myay-Khan Baw village, Seike Phyone village for their helps and effective information.

Finally we would like to thank monk (Sayadaw) Kalonhtar village and all of the participants of this survey.

Map of Tanintharyi Nature Reserve

Introduction

Tanintharyi Nature Reserved is one of the protected area in Myanmar where tropical rain forest ecosystem is being given protection. It is rich in natural resources. The total area is 1700 square kilometer. It is 70 km long with an average width of 24 km orienting in a north south direction. The water system of TNR includes five major perennial rivers and many small seasonal streams. Tanintharyi Nature Reserved is one of a few remaining wilderness areas in the southern part of Myanmar.

Since 2013 the two medicinal plant survey team had already explored the some part of the TNRP areas. The first team conducted survey during in 2013 March to June and the second team was in July to October. Our team surveyed in remaining months from December 2014 to March 2015.

In this survey, (243) medicinal plants were collected. This survey is to list part of the medicinal plant in Tanintharyi Nature Reserved area. Parts use and uses were known that by interviewing native people and local medicinal practitioners. In this report, the medicinal plants are not tested on animal or clinical test to prove the treatment of diseases.

Objective

1. To document the locally and available and accessible medicinal plants in Tanintharyi Nature Reserved and surrounding area.
2. To make dry specimens for preservation at relevant herbaria in TNRP, Forest Research Institute (Ya-Sin) FRI and Universities of Dawei and Rangoon.
3. To identify and describe detail preparation method and to be used as a medicine.
4. To find out the local community; medical plants which are regularly traded in the areas to propagation as a regular crop. It is intended for the local community to inspire a border into outlook.

Photographic records of interview & survey activities.

Photographic records of interview survey activities.

Photographic records of interview & survey activities

Process

1. Investigation and sightseeing the village and surrounding area. Approach the knowledge people, especially age people, monks and local medicinal practitioners to interview about local medicinal plants, which they had known in their gardens and near the forest.
2. If it has morning market, we asked about the source of vegetables, fruit, roots and tubors etc., which come from.
3. Collect information concerning about the traditional medicin in local. Photographs were taken of medicinal plants, including flowers and fruits which were the most important for identification. After that collection the medicinal plants and distinctive plants from the TNR area and some were collected from the garden of the villagers.

Method

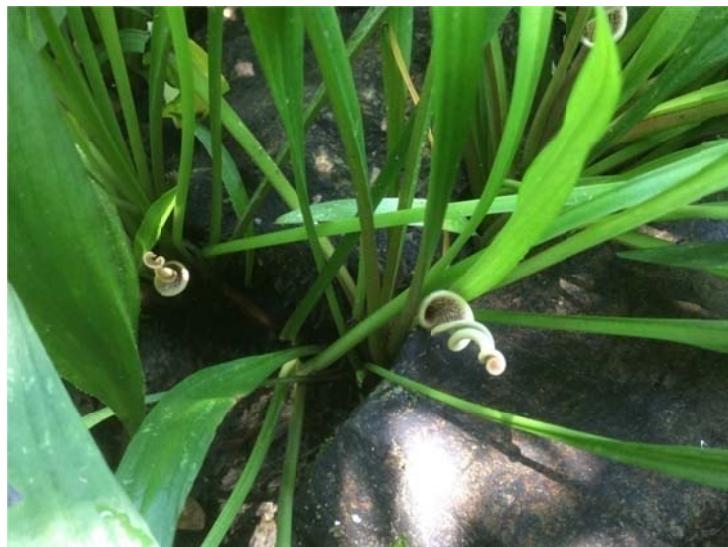

On returning from the field each day collection were immediately trimmed, folded in newspaper, pressed and daried patting in the dryer. Replicate herbarium specimens were collected of all medicinal plants encountered - Duplicates (of all medicinal plant) were deposited at Yangon University, Dewei University and Forest Herbarium at Yesin (Forest Research Institute), Forest Department.

Result

In survey area TNR, Medicinal plants from Hen Ze (Hz), Kyauk Shat (KS) and Ye Bon were found in similar type and habitat, most of the plants were not mush different. But *Bombax insigne* wall was found only one plant near the Community Forest of Ye-Bon Village.

Near the Yay Bone stream and Community Forest, our team found interesting plant which was never seen before. The length of the plant is about one foot. The leaves were narrow and linear tough in texture. Stem herbaceous, possess storage organ rhizome. Because of the above characteristic, it may be specified in family, Iridaceae we named it myet-pan-liin (temporary name).

Another species are Karen traditional medicinal plants called Faw-Li (Karean name), Family lamiaceae. Collected from Ye-Bon village, in the same area, but a little different in habitat and flower.. The Karen local medicinal practitioners said that all are used for cold and cough.

Mallotus pachypodns (Phet-wyn) in TNR, which are found at Migyaung Laung/ Ye Bon and Kyauk-Shat (KS) area, We had photo recorded the microhabitat in Nwe-Lein-Taung, Kyauk-Shat area. But we have not seen in other six survey area. Species distribution are quite different in eight area.

Types of habitat between Ka-Lone-Htar areas and ThatKelKyewt areas are quite similar Da-nyin (*Archidendron giringa*), Phyalar (*Elletaria cardamomum*) and Kan-zaw (*Madehuca longifolia*), which are well known among in traditional medicinal practitioners. These three medicinal plants are the main habitat of the TNR forest. Phalar is the great majority of commercial species in there and they collect the most quantities and trade.

Ecosystem of forest area of Migyaunglaung, is still in good condition. We built base camp beside the road of service track, which was the real nature place. Along the road side we have found plenty of Say

War plant, Thit Lee Taung (Dawei). Say War (Rubiaceae) is famous plant among the local people. It was understood that, Say War root is very effective for menhood. Although Say War is the most extracted medicinal plant for local use but not Commercial purpose. We should traced and study that plant medicinal properties.

Between Kho-hta-ma stream and Tha byu stream, there is micro habitat of Say-o-bok (Nat-ye-da-gone), Family- Rutaceae.

Family Name	- Acanthaceae
Botanical Name	- <i>Andrographis paniculata</i> Nees
Local Name	- Say-khar-gyi
Parts used & Uses	- Whole plant - Carminative, Expectorant Root - Cough, Asthma; Epiphora; Stomatitis; Antidote for scorpions stings; Tooth-ache Leaf - Asthma; Leucoahoea; Haematemesis
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 370/E 098 12 072/152m

Family Name	- Acanthaceae
Botanical Name	- <i>Athatoda visica</i> Nees
Local Name	- Mu-yargyi
Parts used & Uses	- Leaf - Cough Root - Blood disease; Insecticide
Places	- Myekhanbaw
Flowering Period	- Oct- Jan
Fruiting Period	- Oct- Jan
Location	- N 14 32 351/E 098 45 412/174m

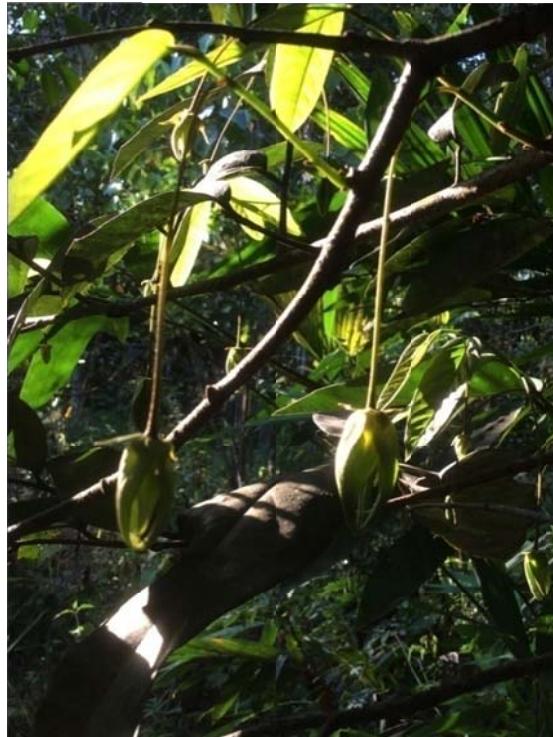

Family Name	- Acanthaceae
Botanical Name	- <i>Barleria prionitis</i>
Local Name	- Lake-su-shwe (white)
Parts used & Uses	- Whole plant- Pruritis; Skin disease; Tooth-ache.
Places	- Thatkelkwet
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 41 045/E 098 18 420/224m

Family Name	- Anacardiaceae
Botanical Name	- <i>Anacardium occidentale</i> L
Local Name	- Thi – hoo
Parts used & Uses	- Bark - Tonic Seed – piuritus
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 109/E 098 22 290/81m

Family Name	- Anacardiaceae
Botanical Name	- <i>Annona muricatal</i>
Local Name	- Duyin-awza
Parts used & Uses	- Fruit - Tonic
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 112/E 098 22 291/78m

Family Name	- Anacardiaceae
Botanical Name	- <i>Desmos chinensis</i> Linn
Local Name	- Ta-nut-sa pin
Parts used & Uses	- Root - Heal sores.
Places	- Myekhanbaw
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 32 351/E 098 44 168/174m

Family Name	- Amaranthaceae
Botanical Name	- <i>Amaranthus spinosus</i> L.Sp.
Local Name	- Hin-nu-nwe subauk
Parts used & Uses	- Whole plant - Antidote for snakebites Leaf - Dysuria, Urolithiasis; hepatitis; Haemorrhoids; Antidote for spider toxin
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 145/E 098 12 087/89m

Family Name	- Amaryllidaceae
Botanical Name	- <i>Crinum Latifolium</i> L
Local Name	- Gamone-gwin-htoe
Parts used & Uses	- Rhizome - Darrhoea; Pyrexia; Anthritis; Fmesis; Otaglia, otic-disease.
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 112/E 098 22 290/76m

Family Name	- Apiaceae
Botanical Name	- <i>Centella asiatica</i> Linn
Local Name	- Myin-Khwa
Parts used & Uses	- Whole plant - Leprosy; Diuretic; Eye tonic; Longevity
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 35 253/E 098 12 304/419m

Family Name	- Apiaceae
Botanical Name	- <i>Eryngium foetidum</i> L
Local Name	- Shan-nam-nan
Parts used & Uses	- Whole plant - Antidote for scorpion stings.
Places	- Yafu
Flowering Period	- Mar- Jun
Fruiting Period	- Apr-July
Location	- N 14 46 321/E 098 04 433/158m

Family Name	- Apocynaceae
Botanical Name	- <i>Plumeria acutifolia</i> Poir
Local Name	- Tayoke-Sagar (ah-phyu)/ Ah-kyaw
Parts used & Uses	<p>Shoot, bark, flower</p> <p>- Leprosy; Pruritis; Febrifuge for prolong fevers.</p> <p>Flower and shoot - Malaria</p> <p>Latex- Very poisonous,----</p>
Places	- Heinze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51 983/E098 18 279/129m

Family Name	- Apocynaceae.
Botanical Name	- <i>Alstonia scholaris</i> R.Br
Local Name	- Taung-mayoe/ Let pan kha
Parts used & Uses	<p>Bark - Astringent; Antiseptic;</p> <p>- Febrifuge Chronic dysentery</p> <p>Leaf - Heals charonic sores.</p> <p>Letene - Heal sore</p>
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 108/E 098 22 291/75m

Family Name	- Apocynaceae.
Botanical Name	- <i>Nerium indicum</i> Mell
Local Name	- Nwe-thargee
Parts used & Uses	- Bark - Dysentery; Seed - Astringent; Anthemintic;
Places	- Thatkelkwet
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 41 043/E 098 18 422/224m

Family Name	- Areaceae
Botanical Name	- <i>Colocasa esculenta</i> Vent
Local Name	- Pein
Parts used & Uses	- Bulb - Tonic Expectorant
Places	- Thatkalkwat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 41 115/E 098 18 541/203m

Family Name	- Areaceae
Botanical Name	- <i>Caryota mites</i> Lour
Local Name	- Min-baw
Parts used & Uses	- Root – Analgesic balm;
Places	- Migyaunglaung
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 43 325/E 098 14 426/98m

Family Name	- Areaceae
Botanical Name	- <i>Caryota mites</i> Lour
Local Name	- Min-baw
Parts used & Uses	- Root – Analgesic balm;
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 314/E 098 12 187/198m

Family Name	- Asclepiadaceae
Botanical Name	- <i>Dischidia majar</i> (Vahl) Merr
Local Name	- Amyit-phwet-thi
Parts used & Uses	- Whole part – Ear-ached; Heart tonic

Family Name	- Asteraceae
Botanical Name	- <i>Artemista parviflora</i> Buch - Han ex Roxb
Local Name	- Taw-say-chauk; Say chauk ayaing
Parts used & Uses	- Juice of leaf - Asthma,
Places	- Alesakhan (Yafu)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51 532/E 098 02 074/158m

Family Name	- Berberidaceae
Botanical Name	- <i>Berberis asiatica</i>
Local Name	- Say-wa gyi; Say war pin
Parts used & Uses	- Bark - Eyedrops; Skin disease; Tooth-ache
Places	- Heainze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 31 096/E098 19 571/245m

Family Name	- Bignoniaceae
Botanical Name	- <i>Millingtonia hortensis</i> Linn
Local Name	- Aegayit
Parts used & Uses	- Leaf and root - Hypertension; Plague Alcohol intoxication; Root - Muscle slifness; Giddiness Leaf - Small pox; Amenorrhoea
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 140/E 098 12 086/89m

Family Name	- Bignoniaceae
Botanical Name	- <i>Haptophragme adenophyllum</i> Wall
Local Name	- Phet-than
Parts used & Uses	- Leaf – Oedema

Family Name	- Bignoniaceae
Botanical Name	- <i>Oroxylum indicum</i> Vent
Local Name	- kyaung-sha
Parts used & Uses	- Root bark and fruit - Haemorrhoids; Abdominal tumours; infections; Expectorant Leaf - Opium intoxication Flower - Improves appetite;----
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 52 020/E 09801 167/148m

Family Name	- Burseraceae
Botanical Name	- <i>Bauhinia variegata</i> L
Local Name	- Swe-taw
Parts used & Uses	- Root - Indigestion Bark - Tonic Leaf and flower - Diarrhoea

Places	- kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 139/E 098 12 079/89m

Family Name	- Caesalpiniaceae
Botanical Name	- <i>Caesalpinia nuga</i> Ait-Hort
Local Name	- Sugauk-net/ Sugauk/ Alolay
Parts used & Uses	- Root - Tonic; Juice of wood - Ophthalmia (for oral and external application)

Places	- Alesakhan(Yafu)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51 529/E 098 02 073/156m

Family Name	- Caesalpiniaceae
Botanical Name	- <i>Cassia siamea</i> lam
Local Name	- Taw-mezeli/ mezeli
Parts used & Uses	- Flower - Conjunetivitis - Leaf - Indigestion; Carminative; Leaf and Flower - Heal blotches on skin due to menstrual disorder;----
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 112/E 098 22 290/76m

Family Name	- Caesalpiniaceae
Botanical Name	- <i>Cassia fistula</i>
Local Name	- Ngu; Ngu Shwe War
Parts used & Uses	- Root and Fruit - Carminative; Herpes - Leaf - Dysuria; Pruritis; Bark - Diarrhoea, Menorrhagia
Places	- Heainze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 31 098/E098 19 571/240m

Family Name	- Caesalpiniaceae
Botanical Name	- <i>Caesalpinia pulcherrima</i> Swartz
Local Name	- Sein-Pan-Kalay
Parts used & Uses	- Whole plant - Febrigue; Carminative
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51 532/E 098 02 072/156m

Family Name	- Caesalpiniaceae
Botanical Name	- <i>Cassia acutifolia</i> Delile
Local Name	- Pwaye-Khaine; Mezili-gyi
Parts used & Uses	- Leaf - Cathartic, Jaundic
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 312/E 098 12 185/193m

Family Name	- Capparidaceae
Botanical Name	- <i>Capparis sepsetaria</i>
Local Name	- Sue-Kauk
Parts used & Uses	- Root - High fever Root bark - Diabetic Imflammation of bladder Leaf – Rheumatism
Places	- Heainze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 30 163/E 098 11 165/149m

Family Name	- Caraceae
Botanical Name	- <i>Carica papaya</i> L
Local Name	- Thin-baw/ shit-kho-thi (Dawei)
Parts used & Uses	- Fruit - Indigestion
Places	- Thatkelkwat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 40 675/E 098 18 064/78m

Family Name	- Combretaceae
Botanical Name	- <i>Quisqualis indica L</i>
Local Name	- Daware hmaing
Parts used & Uses	- Leaf - Gastric pain; Dysentery; - Seed - As an antiseptic; Anthelmintic; Dysentery

Family Name	- Combretaceae
Botanical Name	- Combretaceae <i>Termanalia bellerica Roxb</i>
Local Name	-
Parts used & Uses	- Gum - use as poisons in hunting

Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 139/E 098 12 079/89m

Family Name	- Compositae
Botanical Name	- <i>Blumea balsamifera</i> DC
Local Name	- Hpone-ma-thein
Parts used & Uses	- Leaf - Paralysis agitans; Skin disease; Urinary infection; Gonorrhoea; Cholera; Asthma; Tooth-ache; Antidote for scorpion stings; cough
Places	- Myekhanbaw
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 29 503/E 098 45 505/173m

Family Name	- Cucurbitaceae
Botanical Name	- <i>Momordica charantia</i> L
Local Name	- Kyet-hin-ga
Parts used & Uses	- The whole plant - Ophthalmia; Expectorant; Pyrexia; Young fresh fruit infusion- Lithiasis; infection; Ascites; Arthritis
Places	- Thatkelkwet
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 41 622/E 098 18 124/56m

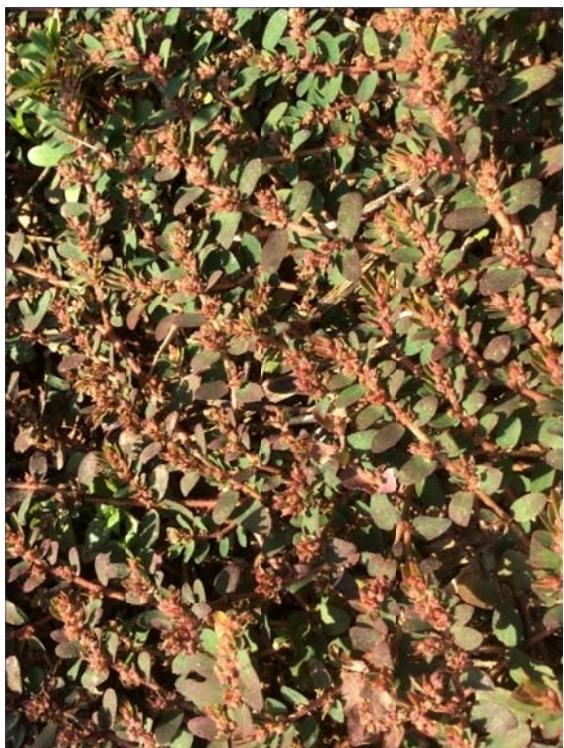

Family Name	- Cucurbitaceae
Botanical Name	- <i>Momordica cochinchinensis</i>
Local Name	- Tha-byut-kha
Parts used & Uses	- Seed – Chestfever. Fruit – Anhalent for asthma

Family Name	- Euphorbiaceae
Botanical Name	- <i>Sauropolis albicans</i> Blume
Local Name	- kyet-tha-hin
Parts used & Uses	- Whole Plant – Indigestion; Fever reduce; Jaundic;

Places	- Kyaukshat
Flowering Period	- Feb - May
Fruiting Period	- Mar – Jun
Location	- N 14 34 137/E 098 12 079/89m

Family Name - Euphorbiaceae

Botanical Name - *Euphorbia thymifolia*

Local Name - Chin-they-noe-yae

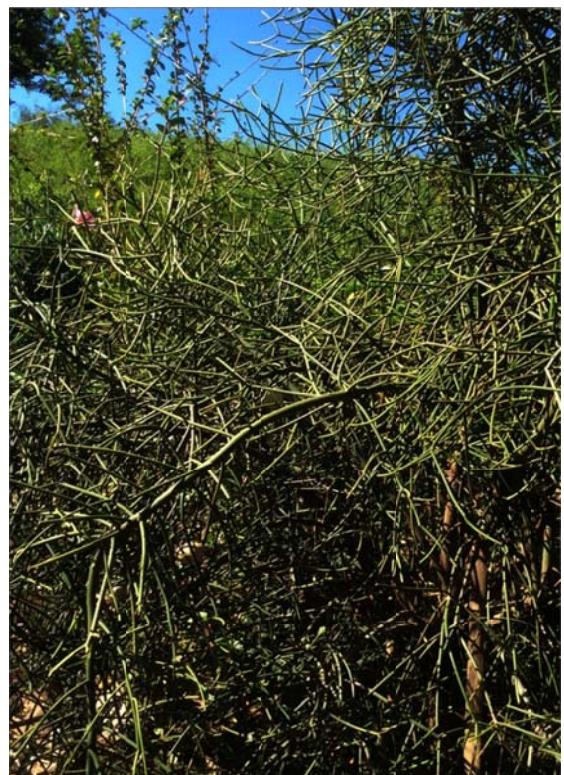

Parts used &
Uses - **Whole Plant** – Dysuria;

Places - Yebon

Flowering
Period - Oct- Jan

Fruiting Period - Dec- Mar

Location - N14 54 105/E 098 22 291/76m

Family Name - Euphorbiaceae

Botanical Name - *Euphorbia tirucalle*.L

Local Name - Finger-tree Ahyooset(Dawei)

Parts used &
Uses - **Latex** - Leprosy: Carminative:
Dyspepsia: Astices

Places - Hnamkye(Heinze)

Flowering
Period - Oct- Jan

Fruiting Period - Dec- Mar

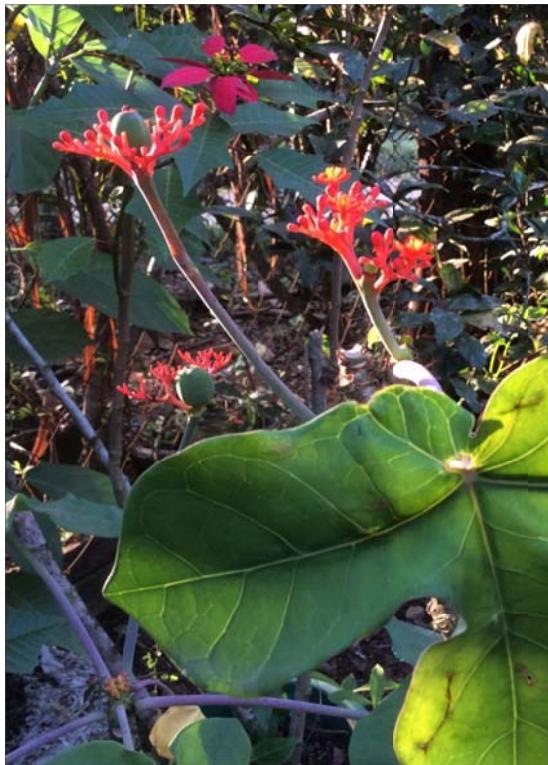

Location - N 14 46 875/E 098 18 073/92m

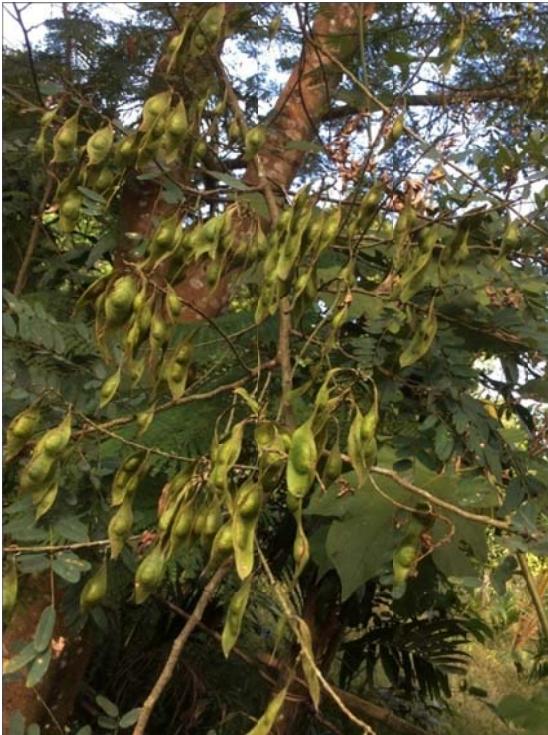

Family Name	- Euphorbiaceae
Botanical Name	- <i>Coroton oblongigolius</i> Roxb
Local Name	- Thet-yin gyi
Parts used & Uses	- Root - Leprosy; Expectorant; Carminative; Purgative Leaf - Dysentery: Seed - purgative.
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51 116/E 098 01 267/224m

Family Name	- Euphorbiaceae
Botanical Name	- <i>Phyllanthus rheedii</i>
Local Name	- Ma-shaw
Parts used & Uses	- Leaf -Antitoxic; Intoxication
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 35 253/E 098 12 304/419m

Family Name	- Euphorbiaceae
Botanical Name	- <i>Jatropha multijida</i> . L.
Local Name	- Se-ma khan
Parts used & Uses	- Whole Plant- Carminative Seed - Healing of bone fracture and wounds.
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 112/E 098 22 290/76m

Family Name	- Fabaceae
Botanical Name	- <i>Abrus precatorius</i>
Local Name	- Ywe-lay
Parts used & Uses	- Root, Leaf and Seed- Cough; Rheuma-tism; Haemorrhoids; Head-ache
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 135/E 098 12 072/85m

Family Name	- Fabaceae
Botanical Name	- <i>Mucuna prurita</i>
Local Name	- Kywaye-la-yar (ni)
Parts used & Uses	- Seed - Astringent effect
Places	- Migyaunglaung
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 43 537/E 098 14 234/63m

Family Name	- Fabaceae
Botanical Name	- <i>Pterocarpus santalinus</i> L.
Local Name	- Nant-thar-ni
Parts used & Uses	- Wood - Expectorant Haemorrhoids; Dysentery;
Places	- Myekhanbaw
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 29 507/E 098 45 506/172m

Family Name	- Fabaceae
Botanical Name	- <i>Alysicarpus vaginalis</i>
Local Name	- Than-ma-naing- kyauk-ma – naing
Parts used & Uses	- Whole plan- Diuretic; Antihelminthic; Cough; malena.

Places	- Migyaunglaung
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 43 498/E 098 14 405/84m

Family Name	- Fabaceae
Botanical Name	- <i>Clitoria acacularis</i> Buch-Ham
Local Name	- Aung-me-phyu, Pe-nauk-ni, Aung-me-nyo
Parts used & Uses	- Root and seed - Diarrhoea; Cathartic The whole pland - Anidote for snake bite

Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 137/E 098 12 075/87m

Family Name	- Fabaceae
Botanical Name	- <i>Derris floribunda</i> Benth
Local Name	- Kyar-ma naing
Parts used & Uses	- Stem - Oliguria, tonic for ment

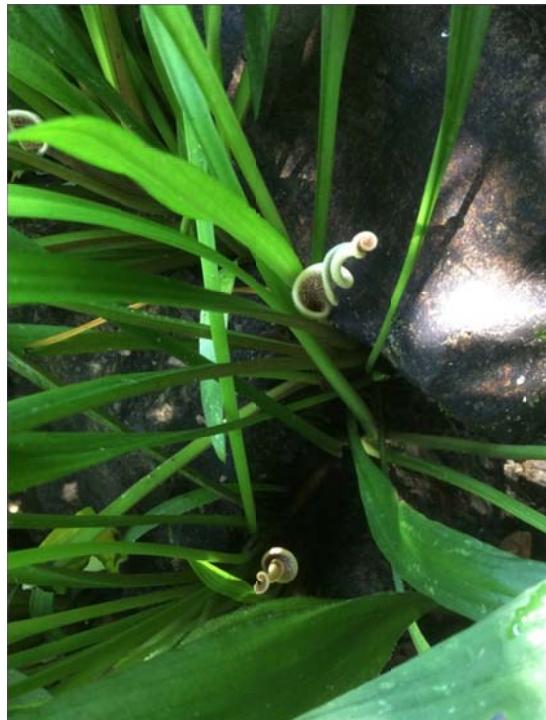

Family Name	- Fabaceae
Botanical Name	- <i>Desmodium triquetrum</i>
Local Name	- Lauk-thay/ Mouk-soe lan
Parts used & Uses	- Leaf - Anthelmntic; Dysuria; Ear-ache; Inection.

Places	- Kyauskhat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 35 253/E 098 12 304/419m

Family Name	- Gisekiaceae
Botanical Name	- <i>Gisekia pharnaceoides</i>
Local Name	- Hin ka lar
Parts used & Uses	- Leaf and seed - Optic disease.

Family Name	- Iridaceae
Botanical Name	- <i>Iris spp</i>
Local Name	- Myet-pan-lein (Temporary name)
Parts used & Uses	- Whole plant -Reduced high fever;
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 53 996/E 098 22 574/104m

Family Name	- Lamiaceae
Botanical Name	- <i>Ocimum Sanchum L.</i>
Local Name	- Pin-sein-net/ ko-la-pin-sein Phaw li ah-net (Karen)
Parts used & Uses	- Whole plant – Cough; Treating generalized oedema; Phlegmatic disease.
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	-

Family Name	- Lamiaceae
Botanical Name	- <i>Ocimum basilicum L</i>
Local Name	- Pin-sein/ zi- yarahpu
Parts used & Uses	- Whole plant – Antiseptic; Carminative; Expectorant;
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 136/E 098 12 074/85m

Family Name	- Liliaceae
Botanical Name	- <i>Asparagus officinalis</i> Linn
Local Name	- Ka-nyut
Parts used & Uses	- Root - Expectorant; Blood tonic.
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 135/E 098 12 074/87m

Family Name	- Magnoliaceae
Botanical Name	- <i>Michelia champaca</i> L
Local Name	- Sa-ga-wa/ Saga
Parts used & Uses	- Bark - Dry cough; Leaf - Puerperal pyrexia; Eye weakness, Chest pain. Flower - Dysuria; Gestrits; Promote kidney function.
Places	- Heainze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 46 875/E 098 18 073/92m

Family Name	- Malvaceae
Botanical Name	- <i>Hibiscus esculentus</i>
Local Name	- Yone-be-de
Parts used & Uses	- Root, Flower, Bark and Seed - Infantile tonic; To produce brest milk;
Places	- Yebon
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 54 110/E 098 22 292/75m

Family Name	- Malvaceae
Botanical Name	- <i>Gossypium herbaceum</i> Linn
Local Name	- Wah
Parts used & Uses	- Root, Flower, Bark and Seed - Infantile tonic; To produce brest milk;
Places	- Heainze(kayinshintabi)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 49 630/E 098 15 701/79m

Family Name	- Malvaceae
Botanical Name	- <i>Hibiscus rosa</i> L
Local Name	- Khaung-yan
Parts used & Uses	- Root of white flowers - Leucorrhoea. Leaf or red flower - Leucorrhoea. Red flower - Menorrhagia;---
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 35 253/E 098 12 304/419m

Family Name	- Marantaceae
Botanical Name	- <i>Maranta bicolor</i> Ker Gawl
Local Name	- An-dar lyut ywet hla
Parts used & Uses	- Rhizome - Tonic
Places	- Yebon
Flowering Period	- Nov-Feb
Fruiting Period	- Dec- Mar
Location	- N14 54 109/E 098 22 290/75m

Family Name	- Melastomataceae
Botanical Name	- <i>Melastoma melabathricum</i>
Local Name	- Say-oh-poke/ Myet-kalay
Parts used & Uses	- Fruit - Cough; Tooth-ache. Leaf – Eyedrop

Family Name	- Melastomataceae
Botanical Name	- <i>Osbeckia chinensis</i>
Local Name	- Say-oh-poke kalay
Parts used & Uses	- Plant - Tooth-ache; eyedrops.

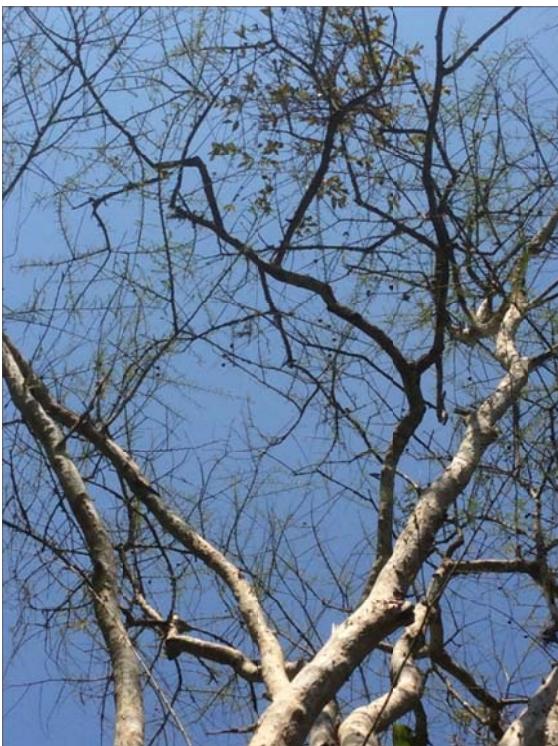

Family Name	- Melastomataceae
Botanical Name	- <i>Osbeckia napalensis</i>
Local Name	- Nat-yae-da-gon
Parts used & Uses	- Fruit - Cough.
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 35 253/E 098 12 304/419m

Family Name	- Menispermaceae
Botanical Name	- <i>Tinospora cordifolia</i> miers
Local Name	- Sin done ma nwe
Parts used & Uses	- Stem - Jaundic; Cough; Leprosy Emesis; Vertigo; To allay thiast; Good for heart; Give energy; For longevity of life;-----
Places	- Kalonehtar(Thatkalkuet)
Flowering Period	- Dec- Mar

Location	- N 14 17 0071/E 098 17 039/309m

Family Name	- Mimosaceae
Botanical Name	- <i>Acacia concinna</i>
Local Name	- Kimmum chin
Parts used & Uses	- Leaf - Ascites; Haemo rrhoids; Tumours. Fruit - Cathartic; Antidote for snake venom. As hair shampoo for anti-septic ----
Places	- Migyaunglaung
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 43 537/E 098 14 299/81m

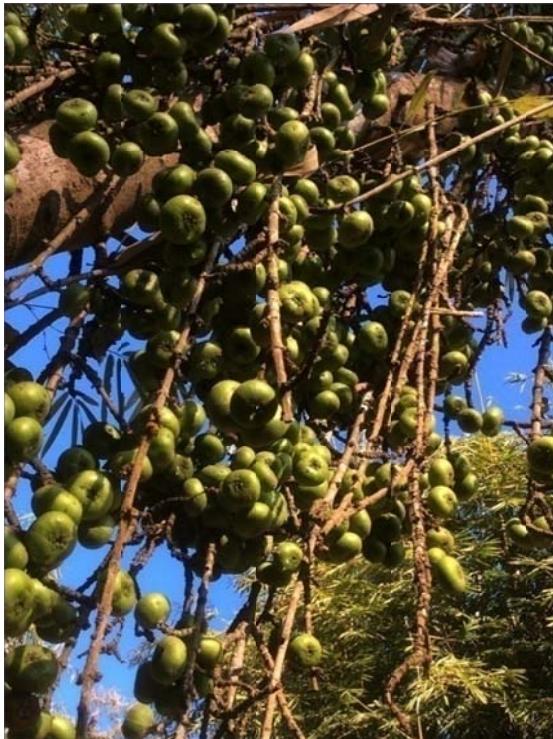

Family Name	- Mimosaceae
Botanical Name	- <i>Acacia catechu</i> Willd
Local Name	- Shit shar
Parts used & Uses	- Bark - Leucoderma; Cough. Tooth applicant for strong teeth Diarrhoea; Gonorrhoea; ----- Leaf - polyuria Flower - Metrorrhagia
Places	- Myekhanbaw
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 32 353/E 098 44 167/174m

Family Name	- Mimosaceae
Botanical Name	- <i>Acacia farnesiana</i>
Local Name	- Nan lon kyaing.
Parts used & Uses	- Root and flower - External use for snake bite; Anti dose of causing infection in animals.
Places	- Kalonehtar(Thatkaikuet)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 17 071/E 098 17 070/265m

Family Name	- Mimosaceae
Botanical Name	- <i>Mimosa pudica L</i>
Local Name	- Hti – kayone
Parts used & Uses	- Root and leaf - Asthma; To give energy.
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 045/E098 12 189/161m

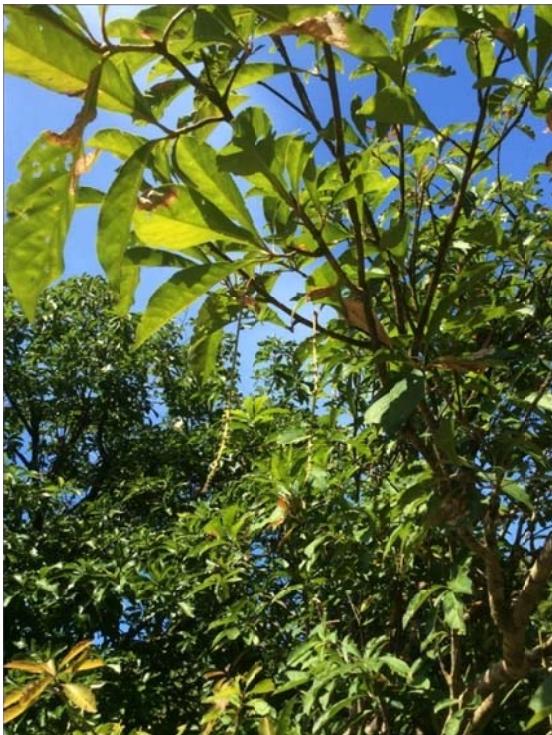

Family Name	- Moraceae
Botanical Name	- <i>Ficus auriculata</i> Lour.
Local Name	- Tha-phan
Parts used & Uses	- Ripe fruit - Energy for cardiac.

Family Name	- Moraceae
Botanical Name	- <i>Ficus glomerata</i> L
Local Name	- Tha-phen/ Yae-tha phen
Parts used & Uses	- Fruit juice - Heal sore and caruncles. Apply to hot formentation.

Places	- Heinze
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 31 097/E 098 19 573/243m

Family Name	- Myrtaceae
Botanical Name	- <i>Barringtonia acutangula</i> Gaertn
Local Name	- Kyee
Parts used & Uses	- Whole plant -Carminative. Root -Cathartic;For longevity life. Leaf -Indigestion;Promotes peristalsis of the intestine;--
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 52 032/E 098 02 528/61m

Family Name	- Myrtaceae
Botanical Name	- <i>Psidium acichum</i> Mart
Local Name	- Hmum-lay thi (Dawei) Malaka-chin
Parts used & Uses	- Root - Reduce inflammation
Places	- Kalonehtar(Thatkaikuet)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 17 070/E 098 17 071/181m

Family Name	- Oleaceae
Botanical Name	- <i>Nyctanthes arbartristis</i> L
Local Name	- Seike-ba-lue
Parts used & Uses	- Leaf and essential oils - Carminative; laxative.
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 51156/E 098 01 267/224m

Family Name	- Pedaliaceae
Botanical Name	- <i>Sesamum indicum</i> L.Sp
Local Name	- Hnan
Parts used & Uses	- Leaf and seed - Galactagogue; Expectorant; heal sores; Carminative; Skin disease; Toothache; Good for hair growth;-----
Places	- Kyaukshat
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 34 312/E 098 12 185/193m

Family Name - Piperaceae
Botanical Name - *Piper-betle* L
Local Name - Kun
Parts used & Uses - **Leaf** - Cough; Eye disease;

Family Name - Piperaceae
Botanical Name - *Piper nigrum*
Local Name - Nga-yoke-kaung
Parts used & Uses - **Fruit** - Phlegm; Catching cold; Expectorant; Asthma

Places - Yebon
Flowering Period - Oct- Jan
Fruiting Period - Dec- Mar
Location - N14 54 108/E 098 22 291/75m

Family Name	- Poaceae
Botanical Name	- <i>Cymbopogon citratus</i> DC
Local Name	- Sa-ba-lin
Parts used & Uses	- Essential oil of whole plant - Arthritis; Tonic, Carminative.

Family Name	- Poaceae
Botanical Name	- <i>Pseudedorophis spinescens</i> R.Br
Local Name	- Pan-yin-myet
Parts used & Uses	- Root - Tooth-ache; Eyedrop

Places	- Kyaukshat
Flowering Period	- Dec- Mar
Fruiting Period	- Dec- Mar
Location	- N 14 35 335/E 098 11 581/285m

Family Name	- Poaceae
Botanical Name	- <i>Axonopus comprssus</i> (Sw) P.Beaul
Local Name	- Myae-shar
Parts used & Uses	- Whole Plant – Infantile release fever;
Places	- Kalonehtar(Thatkalkuet)
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 17 072/E 098 17 073/181m

Family Name	- Poaceae
Botanical Name	- <i>Saccharum crishna</i>
Local Name	- Kyan-net
Parts used & Uses	- Juice of plant – To allay thirsty; Releaving the exhaustion (Except diabetic mellitus)
Places	- Yafu
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N14 52 094/E 098 01 586/179m

Family Name	- Rhamnaceae
Botanical Name	- <i>Ziziphus rugosa</i>
Local Name	- Zi ganauk/ Myaung zi
Parts used & Uses	- Flower - Menorrhagia
Places	- Migyaunglaung
Flowering Period	- Oct- Jan
Fruiting Period	- Dec- Mar
Location	- N 14 43 150/E 098 15 238/108m

Discussion and Recommendation

In the TNR and surrounding areas, medicinal plants, collected locally are still using as herbal medicines to cure illness or injuries by local people. For successful conservation of TNR's natural heritage, cultural resources and knowledge's of local people are playing vital roles. Most of the local medicinal practitioners this long life medicinal knowledge to their sons or the trusted pupil. And local people also learn medical knowledge from the elders and contribute it to others. Systematic training on medicinal plant is still unable among local people at present.

There is an old saying in Myanmar, "All climbers, creepers, grasses, plants have medicinal properties.

The survey team only emphasized on the recording, identification of medicinal plants and use parts and uses in medicine. This research could be said, therefore, an etho medical research also effectively contribute to the strengthening of indigenous culture of the Taninthayi region.

According to the survey mentioned above, this survey should be carried out in the whole area of TNR.

Condolencent

Daw Than Than Aye (63 year), National Consultant, Medicinal plant survey at TNR, suddenly expired on 28th February, 2015 at field trip of this survey.

We, medicinal plant survey members would like to express our deep sorrow of losing such a competent, experienced, hard working consultant.
